ADDENDUM NUMBER ONE TO PRESENTENCE REPORT - PART ONE

GENERAL STATEMENT:

This report supplements the attached prior Presentence Report. On July 1, 2025, the defendant was placed on 3 years' concurrent probation in CR20251060 for **Amended Count 14-A.R.S. § 13-2923, STALKING-DISTRESS/FEAR, Class 5 Felony** and in CR20251454 of **Amended Count 1 - A.R.S. § 13-2921.01A1A, AGGRAVATED HARASSMENT-COURT ORDER IN PLACE, Class 6 Felony**. A Petition to Revoke Probation was filed July 9, 2026.

ADDITIONAL VICTIM IMPACT STATEMENT

I am submitting this statement pursuant to A.R.S. § 13-4424(A).

Lane Myers has spent the last two years trying to ruin my life because my husband prosecuted him. For his initial actions, he pleaded guilty to stalking and harassment. His more recent conduct resulted in his probation being revoked.

Lane lied in his last interview with probation, including when he said he never encouraged anyone to contact me and when he claimed I got his wife fired—something she admitted under oath was not true. Many of the other factors that caused him to score so low are also not accurate. He regularly abuses drugs, including in videos he posts online. He has no stable housing or income. He and his girlfriend have broken up, his family has not provided him with any apparent support throughout this process, and his friends are convicted criminals who encourage his criminal behavior because they engage in the same type of harassing internet behavior as he does.

Lane uses the internet as both a drug and a weapon. He has used his YouTube channel to harass and dox numerous people—even while on probation and subject to conditions intended to stop this behavior.

Based on the last two years of his conduct, Lane's own statements, and his repeated efforts to circumvent the conditions imposed on him, I do not believe there are any probation conditions that he will voluntarily abide by. If he is ultimately returned to probation, I am extremely concerned about the safety of me, my family, and others without regular and frequent supervision and significant monitoring and restriction of his internet use. The length of any future probation is also important because Lane has made statements indicating that once he is no longer on probation, he intends to return to the same type of conduct that resulted in his criminal case and has continued throughout his probation.

Thank you for considering my statement.

PROBATIONER PERFORMANCE:

The following is a summary of the probationer's compliance with the conditions of probation:

	<u>SUMMARY</u>

<u>Reporting to APD</u>	• Reported to APD when requested

(YouTube Handle "Reluctant Profit.") • Do not post information about the victim, her husband or her minor children on YouTube or other social media.

RISK ASSESSMENT:

The probationer's most recent assessment places him in the HIGH Risk/Needs Classification. Probationers who present in the HIGH Risk/Needs classification are best served with targeted interventions through the Intensive Probation Supervision program.

EVALUATION:

The defendant is a 43-year-old male appearing before the Court for disposition on a Petition to Revoke Probation. The defendant violated the conditions of his probation by posting social media videos discussing the case and referencing the victim. Despite clear instructions provided to the defendant, along with the probation department's efforts to have all such content removed, numerous videos reappeared post sentencing on various social media platforms.

Regarding disposition, the defendant has demonstrated a continued inability to comply with Court-imposed conditions. Despite clear directives and efforts by the probation department to have all case-related social media content removed, the defendant persisted in posting videos that discuss the case and reference the victim. His ongoing behavior includes harassment and disparagement of the victim and her husband, indicating a willful disregard for the boundaries established by the Court.

Based on these continued violations, the defendant's conduct raises significant concern regarding his suitability for ongoing community supervision. The probation department has utilized reasonable interventions without achieving compliance. The defendant's repeated misuse of social media to target involved parties suggests an increased risk to the community and a lack of amenability to supervision. At this time, he appears to be an inappropriate candidate for continued community supervision, and a heightened level of accountability may be warranted.
